

BIB & BEB Whirlybird

Installation Instructions

1. To determine roof pitch, place gauge on peak of roof as shown. Position straight edge as shown. Read roof pitch from printed gauge parallel to bottom of straight edge.

2. After turning bottom of elbow clockwise to align roof pitch number with indicator line on flashing. Place 3 short screws through holes that line up with predrilled holes in base.

3. Using back of this page determine placement of turbine(s). Locate base opening between rafters and mark hole(s) to be cut. Locate rafters by tapping roof.

4. Cut hole as marked. Seal around top and sides with roofing cement

5. Slide top half of flashing under shingles. Secure with nails.

6. Rotate top of elbow to level position by turning counter clockwise.

7. Place locking clamp across seam and tighten as shown, with machine screw.

8. Seal all seams and nails with roofing cement.

9. Position whirlybird on the base. Line up the predrilled holes in the brackets and base and fasten with long sheet metal screws.

10. After installing check to see that whirlybird turns freely. In transportation it may have shifted slightly. If necessary, minor adjustment may be made by gently prying lowest point of turbine upward to remove any wobble.
